

# Tri-Vent® Series DK

## Frost-freeze Discouragement

Reduce or eliminate unplanned winter outages with the Tri-Vent® Series DK® Freeze Discouragement Discharge-air Knife.

The Series DK discourages hoarfrost, freezing condensate, and snow from blinding the inherently freeze-resistant Enduralast® Media Tri-Vent® Elements..

Easy to install, and requiring no external power, the Series DK® recycles waste heat produced by normal blower function, delivering high-pressure, warm air exactly where it is needed at the filter inlet.

Available with fully automated controls, the Series DK® is available on all Tri-Vent® Series Intake Filter-Silencers

*The Future of Filtration*
